**THE IC4U CREATED FOR THE MILITARY IS NOW AVAILABLE
AT AN AFFORDABLE PRICE.**

***Compatible with Your Existing Legacy Radios
for a Complete Analog/Digital
Interoperability Solution.***

In 2004 IPS developed the IC4U® (Advanced Command Control Communications Unit), a shelter that is mounted on a truck, Humvee or transported by air. The communications shelter provides voice, data and situational awareness in a highly mobile and easy to deploy package. The system integrates seamlessly with established radio communications infrastructures, without the need to replace legacy equipment.

We have now taken the product a step further by putting this radio interoperability solution into a trailer that enhances original capability and reliability. The ideal users of the AC3S-G2® are agencies such as offices of emergency services, fire, police departments, non-profit organizations and civilian volunteer groups.

WHAT THE MILITARY HAD TO BUY, YOU CAN LEASE TO OWN. We have established relationships with leasing companies to deal with the tight state, city and municipal budgets. Leasing programs stretching over 36 to 60 months will insure that the AC3S-G2® will be easier than ever to acquire and deploy. **BE PREPARED TODAY BEFORE THE NEXT EMINENT DISASTER.**

A multi-agency purchase can be made to share equipment ownership as directed by Michael Chertoff, Secretary of Home Land Defense.

- **Interoperability Proven During Katrina & Rita Recovery Operations**
- **Affordable – Keep & Use Existing Legacy Equipment**
- **Budget Friendly – Lease Program Available**
- **Shared Ownership Program**

MAINTENANCE

IPS and its partners will continue to provide upgrades to software & hardware. Any issues that may arise during the term of your lease will be available by phone, or internet 24/7/365.

TRAINING

Training is the solid foundation for successful missions. IPS will provide on-line, self-paced training for your staff. This is part of your total leasing package. Should you require on-site training, we will be happy to make our experienced and reliable instructors available on a quote basis. The AC3S-G2® is designed to be user-friendly and intuitive which shortens operator training.

Operators now can be trained from volunteer organizations such as CERT, Ham Radio Operators and the Red Cross, even further reducing operating cost.

VALUE-ADDED CAPABILITY

IPSM (IPS MeteoStar, Inc.), a branch of IPS, is a premier provider of weather forecasting, and predictive modeling. We can provide IPSM forecasting tools with the AC3S-G2® to help you predict wind, rain, flooding and other phenomena.

THE LEASING PROGRAM

Once you have selected the exact configuration, IPS will make arrangements with leasing providers for competitive rates and payment plans to fit your budget.

IPS offers a new dimension of preparedness and an affordable approach to meet the need of wireless communications. Solve your budget problems through our lease-to-own program, eliminating the lengthy process of a grant application.

The IC4U® was crucial to the relief effort at Hurricanes Katrina and Rita. For more information about our participation, please see our website at www.ac3systems.com/
